PROJECTS

IT CITY ACADEMY   VIEW DEMO

- IT CITY ACADEMY is a website thatprovides complete information about itcity academy, it is a site that providesinformation about courses such asbusiness training, programming courses frontend and backend, computer literacy, systemization.

RAILWAY   VIEW DEMO

- RAILWAY is a 3-panel site that gives you complete control over your railway workflow. This greatly facilitates the monitoring of employees, the accounting of used equipment and similar processes through the site. Through this program, a campaign saves an average of $5,000 - $10,000.

BOOKERS   VIEW DEMO / ADMIN

- This site is the admin panel of the startup project called Bookers, through which the admin controls and manages the actions of the master and clients and information about them.
- The master and client part of this project has been released as a mobile app in REACT NATIVE, and you can download the app through bookers.app. This project is made for barbers to gather all barbers on one platform and systematize them, masters can accept online orders and help to maintain work schedules, and clients can also leave an online request to any master they want at any time. . The minimum amount of money received through this startup project is $50,000 - $100,000.

GEODEZIYA   VIEW DEMO

- GEODEZIYA is a 3-panel website and the program is mainly managed by staff and admin. In the client panel, you can only test the fields. What does the site do? -those who want to be employed in the company are required to pass these tests first, here the employees enter the tests in the direction section and pass the theoretical and practical test there. This site will save the company valuable time and increase productivity.

GSR LOGISTIC   VIEW DEMO

- GSR LOGISTIC is a website that controls and organizes bulk cargo transportation between Uzbekistan and China. Through this project, cargo control will be greatly strengthened, and the labor force will be enriched and facilitated. - in addition, the paperwork has been systematized with a much reduced amount. One of the useful aspects is that clients can track the location, status, and arrival of their orders online. This project will generate an average profit of $50,000 - $70,000 for the company.
